smallest effective dose. To ensure optimal patient safety, a new 10-day unit-of-use package is currently under development.

The revised labeling also focuses on the need for careful initial and continuing evaluation of patients presenting with a complaint of insomnia. Physicians are urged to consider the possibility that insomnia may be a manifestation of an underlying psychiatric or physical disorder. They are advised to carefully evaluate the emergence of any abnormal thinking or behavioral changes that may occur in patients being treated with HALCION giving appropriate consideration to all potential causes and the relevant information in the package insert.

The US Food and Drug Administration is interested in providing information for patients regarding HALCION, and The Upjohn Company shares this interest. The Upjohn Company will help to inform your patients by providing a special package insert about insomnia and its appropriate treatment with HALCION. The PPI focuses on the benefits and risks of benzodiazepine hypnotics generally, and also provides specific information about HALCION. This PPI will be included with each prescription and is attached for your information.

The complete revised physician package insert is attached for your information, and the special changes in the Indications and Usage, Warnings, and Dosage and Administration sections are
